PSYCHOLOGY AND PHILOSOPHY

I.—COMPUTING MACHINERY AND INTELLIGENCE

By A. M. TURING

1. The Imitation Game.

I propose to consider the question. '(An machines think I') This should begin with definitions of the meaning or the remes 'machine' and think'. The definitions might be framed so as to reflect so far as possible the normal use of the words, but this attitude is dangerous. If the meaning of the words 'machine' and 'think' are to be found by extramining how they are commonly used it is difficult to escape the conclusion that the meaning and the answer to the question, 'Can machines think I' is to be sought in a statistical survey such as a Gallup poll. But this is absurd. Instead of attempting such a definition I shall replace the question by another, which is closely related to it and is expressed in relatively unambiguous words.

Kunstig intelligens

Teknologi som løser oppgaver som krever en eller annen form for menneskelig intelligens

Et fagfelt som produserer teknologi som løser oppgaver som krever en eller annen form for menneskelig intelligens

Teknologi som lærer seg å løse oppgaver ved hjelp av å finne mønstre i treningsdata

Kunstige nevrale nettverk som lærer komplekse sammenhenger mellom input og output

Veiledet Ikke-veiledet

Forsterkende læring

Generativ kunstig intelligens

Muligheter

Erfaringer

Sørg for at data som kommer inn når systemet er satt i produksjon matcher treningsdataen!

- Vurder om brukere trenger opplæring
- Legg inn gode instruksjoner i sluttbrukerapplikasjonen

Erfaringer: Radiologi

Erfaringer: Bildeanalyse
